PCM OS/2 Compatible Systems

INFORMATION UPDATED THROUGH LAST BUSINESS DAY OF NOVEMBER 1995

The IBM OS/2 operating system supports all Intel 386SX and higher (or compatible) based Personal Computer Manufacturer (PCM) systems in the marketplace. The following table depicts those PCM's systems that have passed compatibility testing with the IBM OS/2 products. IBM compatibility testing verifies (25) key functions of the OS/2 operating system. These test results are based on selected PCM model configurations tested.

The following IBM OS/2 products have been tested on a significant number of PCM systems listed in the table below. Based on these tests, IBM has determined that these products are considered compatible with all the PCM systems listed.

- o OS/2 Extended Services Version 1.0
- o DataBase 2 for OS/2 (DB2/2) Version 2.0
- o Extended Services CID Utility
- o Communications Manager/2
- o CM High Speed SDLC/2
- o Distributed Database Connection Services/2 (DDCS/2)
- o OS/2 LAN Server Version 4.0
- o OS/2 LAN Enabler Version 2.0
- o LAN NetView Start Version 1.1
- o NTS/2 Version 1.0
- o RouteXpander/2 (RXR/2)
- o System Performance Monitor/2 Version 2.00.1
- o NetWare From IBM Products
- o Lan Distance Version 1.1

Note: This table is available electronically on the these Bulletin Board Systems, IBM National Support Center BBS (data connection: 919-517-0001) CompuServe (IBM OS/2 Support Forum \ Library \ IBMFiles \ PCMTABLE.ZIP), Prodigy, LAN Server & OS/2 BBS - Sydney Australia, IBM Austria BBS - Vienna, Austria, IBM BBS - Vancouver, BC., Canada, IBM PS BBS - Hong Kong, IBM OS/2 BBS & IBM AP OS/2 BBS - Singapore. IBM BBS - Belgium, IBM BBS - England, IBM BBS - Spain, OS2BBS - Denmark, Hotline BBS - Switzerland, DAP & PSP BBS - Italy, IBM BBS - Jakarta, OS/2 BBS - Thailand. This list is also on the internal IBM Forum MKTTOOLS as PCMTABLE Package.

Note: The compatibility test information provided herein is provided for information purposes. IBM makes no warranty, express or implied, with respect to the operation of OS/2 on the personal computers listed.

Internet

The OS/2 Hardware Compatibility List information can be found on the Internet at:

IBM OS/2 Compatible Hardware Devices

The following tables specify hardware devices tested and found to be compatible with IBM OS/2 Version 2.x. The 'Available' column indicates either the initial OS/2 release containing support for the device or the company from which device driver support is available. Unless otherwise noted, device drivers included in OS/2 are carried forward to subsequent releases of the operating system.

Not all of the products listed have been tested by IBM. Many have been tested by the respective hardware vendors or third parties.

Presence on this list does not necessarily mean that the product listed is compatible with OS/2 in your system configuration. When in doubt, you should seek additional information from your dealer or the appropriate vendor.

The compatibility test information provided herein is provided for information purposes. IBM makes no warranty, express or implied, with respect to the operation of OS/2 with the devices, or adapters listed.

NOTE: This table is available on the IBM National Support Center Bulletin Board System (919-517-0001), on CompuServe (IBM OS/2 Support Forum \ Library \ IBM Files \ PCMTABLE.ZIP), and on the internal IBM forum MKTTOOLS as PCMTAB PACKAGE.

Display Adapters

Unless otherwise noted all support listed is 32 bit seamless drivers, supporting 256 colors in 640x480, 800x600 and 1024x768 resolutions. Multiple driver listings indicate driver is available from more than one source.

Corporate Listings: Acer Laboratories, Inc. - Avance Logic

NOTES:

1. The 'Pen for OS/2' operating system extension is available through your OS/2 dealer.
2. RODNT100.ZIP (shareware from Michael Lee Finney) is available on the IBM PCC BBS (919-517-0001), CompuServe OS2USER, Genie, and other BBS's. A beta containing additional support is available to registered users. See RODENT documentation for information on additional devices (not included in this table) which have been tested by users. See also the Mice and Trackballs table in this document. RODENT.SYS tablet support provides mouse emulation.
3. Available on APT BBS (510-803-9018) as GLIFF101.ZIP (file area #2).

LAN Adapter Support

The following table does not imply testing or certification by either IBM and/or National Software Testing Labs (NSTL). Where appropriate, certification of these adapters is indicated in this table.

LAN Server support is indicated as follows:

YES means driver is included in the LAN Server product, and LAN Server is supported using the adapter card. The adapter card and driver are supported by the vendor.

Vendor means LAN Server is supported using the adapter card, but the driver is not included and must be obtained from the vendor of the adapter card.

Tape Support

The following table shows tape hardware devices that are supported under OS/2 by third parties. IBM makes no warranty, express or implied, with respect to the operation of these devices with the software listed below nor to the completeness of this list. When in doubt you should seek additional information from your dealer or the appropriate vendor. Vendor phone numbers for the products listed are at the end of this table.

Corporate Listings: ADIC - Cristie Electronics, LTD.
